JM EPDM Single Ply Roofing

JM EPDM Single Ply Roofing

From the Johns Manville Family of Roofing Solutions

Our leadership in the roofing systems business is obvious with our 150-year history in the building products industry. It is also clearly evident in our EPDM (ethylene propylene diene monomer) single ply roofing system. With 29 years of experience with this product, backed by our financial strength as a Berkshire Hathaway company, we are confident in delivering the highest quality roofing system with proven results.

It is the continuing goal of JM Roofing Systems to respond to all of our customers' needs with a comprehensive portfolio of best-of-class solutions. Today, we are the only manufacturer offering an all-inclusive list of commercial low-slope roofing alternatives. Our consultative expertise is always available to help you determine the best solution for your project.

Our market-focused business model utilizes our expertise and global resources to complement our proven performance with innovative products offering enhanced characteristics. Invinsa™, for example, our lightweight, impact-resistant cover board, recently was introduced to enhance our single ply roofing systems.

Our roofing systems and products are further strengthened by our commitment to deliver superior service. This includes technical support to promote new solutions, as well as customer service that will help you confidently expand your business.

Superior Weatherability in a Single Ply Solution

JM EPDM is the JM thermoset single ply membrane solution. The polymer allows the membrane to become rubberlike, allowing it to respond to stress and recover its original shape. This elasticity gives the membrane proven weatherability through a wide range of temperatures and conditions. Its durability, strength and ozone resistance make it an excellent solution for your roofing needs.

The Enhanced Characteristics You're Looking For

JM EPDM brings value to your roof with these important attributes:

- Highly flexible
- Dimensionally stable
- Nonreinforced and reinforced membranes
- High UV resistance
- Cleaner membrane
- Butyl tapes or adhesives used for seaming

The JM EPDM product line includes accessory products such as adhesives, sealants, flashing materials, coatings and specialty roofing products.

Easy Installation, Using a Variety of Techniques

With wide widths, JM EPDM can be applied quickly, cleanly and inexpensively in a wide range of temperatures. For a new roof or re-roof application, it can be installed in ballasted, mechanically attached or fully adhered applications.

Excellent Re-cover Solution

The JM EPDM system, when used in conjunction with JM polyisocyanurate insulation boards or Invinsa™ Roof Board, can be installed over existing roof systems. (See your local JM sales representative for specific system and guarantee requirements.)

When allowed by local code regulations and when building conditions permit a re-cover, you may not have to remove the old materials on a re-roofing job. In these cases, you can simply use a JM separator board and roof over the previous system, including built-up systems containing asphalt. This greatly reduces tear-off labor and debris disposal costs. It also saves the cost of reinvesting in a new insulation system.

Available in a Variety of Membrane Thicknesses and Roll Sizes

**Single Ply Roofing Systems
JM EPDM Roofing Membranes**

Standard Roll Sizes

Product	Widths	Lengths
45 FR	10' (3.05 m)	50', 100' (15.24 m, 30.48 m)
	20' (6.1 m)	50', 100' (15.24 m, 30.48 m)
	30' (9.14 m)	100' (30.48 m)
	40' (12.19 m)	100' (30.48 m)
60 FR	10' (3.05 m)	50', 100' (15.24 m, 30.48 m)
	15' (4.57 m)*	100' (30.48 m)*
	20' (6.1 m)	50', 100' (15.24 m, 30.48 m)
	30' (9.14 m)	100' (30.48 m)
90 FR	10' (3.05 m)	100' (30.48 m)
45 R	10' (3.05 m)	100' (30.48 m)
60 R	10' (3.05 m)	100' (30.48 m)

* Full-width, no-fold membrane.

Meet Important Application Standards

For a complete listing of FM Global®, Underwriters Laboratories Inc. and applicable test methods, visit us on the Web at www.jm.com/roofing or contact Technical Services at (800) 922-5922.

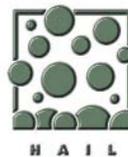

Defy the Elements – Specify JM EPDM

The JM EPDM single ply roofing system is part of the JM family of roofing systems. They each have their own special features and advantages. JM's determination to defy the elements will provide you with performance, protection and peace of mind.

You are making a significant and long-term investment in your roof. There is untold value in working with a company that has the experience, strong reputation and acknowledged expertise of Johns Manville. We have the history to confidently stand behind all of our products. Choose the system that meets your needs, from the company you trust.

Fully adhered, nonreinforced JM EPDM single ply roofing system. For use over Johns Manville insulation, approved decks or other approved insulation on inclines up to 6 inches per foot (500 mm/m).

PRODUCT WARRANTIES

Johns Manville designs roofing products that work together to provide a one-source comprehensive roofing system solution. Total roofing system guarantees are available under the JM Peak Advantage® Guarantee program. To learn more about our standard guarantee terms and conditions, visit our Web site at www.jm.com or talk to your local JM sales representative.

JM Peak Advantage Guarantees are available only on qualified JM roofing systems containing JM roofing products. JM standard product terms and conditions will apply to include a one-year limited product warranty. Limited product warranty information is available at www.jm.com/About Us/US Terms and Conditions.

Peak Advantage® Contractor Program

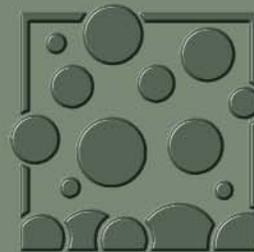

To ensure quality workmanship and top-notch installation, JM offers its Peak Advantage Contractor Program. Contractors selected to participate are proven to be best of class, having lived up to the highest performance standards. These contractors have access to JM's strongest guarantees. To be assured of the best possible results on the roofing system you specify, make sure it's installed by a JM Peak Advantage contractor.
